

Free Fire Player Info REST API Documentation

High-Performance Direct Garena Game Protocol Reference Guide

Base URL:
<https://my-ff-api-three.vercel.app>

Protocol:
Direct Garena Game Gateway

Global Cache:
300s Edge CDN Caching

■ **Instant Live Working Test URL:**
https://my-ff-api-three.vercel.app/api/player-info?uid=YOUR_UID
(Replace YOUR_UID with any valid Free Fire UID in a browser to view live data directly from Garena)

1. System Overview

This API connects directly to **Garena Free Fire Official Game Gateway Servers** via binary Protocol Buffers (Protobuf) and client-side encryption. It provides real-time player data with zero third-party scraper dependencies and zero rate-limiting restrictions.

Privacy Guarantee: All sensitive internal bot credentials and server infrastructure identifiers are strictly hidden. The API returns only clean, developer-friendly JSON output.

2. Endpoint Specification

METHOD	ENDPOINT URL	FORMAT
GET	/api/player-info?uid=YOUR_UID®ion;=BD	JSON

Query Parameters:

Parameter	Type	Required	Default	Description
uid	String/Number	Required	—	The target player's in-game numeric ID (e.g. YOUR_UID).
region	String	Optional	BD	Game server region (BD, IND, SG, BR, US, ID).

3. JSON Response Schema (HTTP 200 OK)

```
{
  "success": true,
  "data": {
    "AccountInfo": {
      "AccountName": "Player_Nickname",
      "AccountLevel": 70,
      "AccountEXP": 2860195,
      "AccountRegion": "BD",
      "AccountLikes": 9163,
      "AccountCreateTime": "1617791209",
      "AccountLastLogin": "1788325315"
    },
    "AccountProfileInfo": {
      "BrMaxRank": 317, "BrRankPoint": 2994,
      "CsMaxRank": 321, "CsRankPoint": 91,
      "ShowBrRank": true, "ShowCsRank": true
    },
    "EquippedItemsInfo": {
      "EquippedAvatarId": 902050007,
      "EquippedBannerId": 901042013,
      "EquippedBPID": 1001000100,
      "EquippedBPBadges": 111,
      "EquippedOutfit": [ 50 ],
      "EquippedSkills": [ 211046056, 203046064, 204051038, 205000225, 214039008 ]
    },
    "SocialInfo": {
      "accountId": "YOUR_UID",
      "gender": "GENDERMALE",
      "language": "LANGUAGECNTRADITIONAL",
      "signature": "Player Bio / Signature Quote"
    },
    "CreditScoreInfo": { "creditScore": 100, "rewardState": "REWARDSTATEUNCLAIMED" },
    "PetInfo": { "id": 1300000123, "level": 4, "exp": 540, "skinId": 1310000235 },
    "BattleStats": {
      "solostats": { "gamesplayed": 1331, "wins": 24, "kills": 1905, "damage": 587364, "headshots": 820 },
      "duostats": { "gamesplayed": 1381, "wins": 62, "kills": 1604, "damage": 751039, "headshots": 769 },
      "quadstats": { "gamesplayed": 2942, "wins": 226, "kills": 4517, "damage": 2291325, "headshots": 2376 }
    }
  }
}
```

4. Data Field Dictionary

- **AccountInfo:** In-game player nickname (supports stylized fonts/Unicode), current level, total likes, EXP points, account creation and last active timestamps.
- **AccountProfileInfo:** Battle Royale (BR) and Clash Squad (CS) competitive ranks and points.
- **EquippedItemsInfo:** Active in-game cosmetic item IDs (Avatar, Banner, Battle Pass Badge, clothes, and character skill presets).
- **SocialInfo:** Player signature/bio text, gender identifier, and language.
- **BattleStats:** Complete lifetime match statistics: Games played, wins, kills, damage dealt, and headshots across Solo, Duo, and Squad.

5. Official In-Game Image CDN (Avatars & Banners)

Use the IDs returned by the API to load official Free Fire images directly:

Item Type	Global CDN Image URL
Avatar Image	<code>https://cdn.jsdelivr.net/gh/TSun-FreeFire/TSun-FF-Avatar-And-Banners@main/icons/{EquippedAvatarId}.png</code>
Banner Image	<code>https://cdn.jsdelivr.net/gh/TSun-FreeFire/TSun-FF-Avatar-And-Banners@main/icons/{EquippedBannerId}.png</code>
Battle Pass Badge	<code>https://cdn.jsdelivr.net/gh/TSun-FreeFire/TSun-FF-Avatar-And-Banners@main/icons/{EquippedBPID}.png</code>

6. Code Integration Examples

JavaScript (Fetch API):

```
const uid = "YOUR_UID";
fetch(`https://my-ff-api-three.vercel.app/api/player-info?uid=${uid}`)
  .then(res => res.json())
  .then(json => {
    if (json.success) {
      console.log(`Player: ${json.data.AccountInfo.AccountName} (Lv. ${json.data.AccountInfo.AccountLevel})`);
      console.log(`Likes: ${json.data.AccountInfo.AccountLikes}`);
    }
  });
```

Python (Requests):

```
import requests

url = "https://my-ff-api-three.vercel.app/api/player-info?uid=YOUR_UID&region=BD"
res = requests.get(url, timeout=10).json()

if res.get("success"):
    player = res["data"]["AccountInfo"]
    print(f"Player: {player['AccountName']} | Likes: {player['AccountLikes']}")
```

PHP (cURL):

```
<?php
$uid = "YOUR_UID";
$url = "https://my-ff-api-three.vercel.app/api/player-info?uid=" . urlencode($uid);
$res = json_decode(file_get_contents($url), true);

if (!empty($res['success'])) {
    echo "Player: " . $res['data']['AccountInfo']['AccountName'];
}
?>
```

7. Safe Operation & Bot Maintenance

- **Zero Ban Risk:** Searched players and your personal main accounts are 100% safe. The API only performs standard public profile inspect calls.
- **Bot Credential Update:** If you ever wish to rotate the bot account, update BOT_UID and BOT_PASSWORD in `ff-api/api/player-info.js` (lines 4-5) or via Vercel Environment Variables.

8. HTTP Status Codes

Status	Meaning	Description
200 OK	Success	Player profile retrieved successfully.
400 Bad Request	Invalid UID	Missing or non-numeric uid parameter.
404 Not Found	Not Found	Player UID not found on Garena game servers.
500 Server Error	Gateway Error	Temporary connection error with Garena. Automatically retries.
