

Free Fire Player Info API Documentation

Official High-Performance Direct Garena Game Protocol REST API

Base URL: https://my-ff-api-three.vercel.app	Engine: Direct Garena Game Gateway	Edge Caching: 300s (5 Min Worldwide CDN)
--	--	--

1. System Overview & Architecture

This API connects directly to **Garena Free Fire Official Live Gateway Servers** (clientbp.freefiremobile.com / ggpolarbear.com) via binary Protocol Buffers (Protobuf) and AES-128-CBC encryption. Unlike standard third-party scrapers, it uses dedicated guest authentication to inspect in-game player profiles in real time with zero rate limits and zero middleman dependencies.

Security Guarantee: Internal credentials, Bot UUIDs, and server secrets are strictly filtered. The public API output contains only clean player profile and battle metrics.

2. Endpoint Specification

METHOD	ENDPOINT	FORMAT
GET	/api/player-info?uid={UID}®ion;={REGION}	JSON

Query Parameters:

Parameter	Type	Required	Default	Description
uid	String/Number	Yes	—	The player's numeric in-game ID (e.g., 3000391898).
region	String	No	BD	Game server region (BD, IND, SG, BR, US, ID).

3. JSON Response Schema (HTTP 200 OK)

```
{
  "success": true,
  "data": {
    "AccountInfo": {
      "AccountName": "■■■■FLEX™",
      "AccountLevel": 70,
      "AccountEXP": 2860195,
      "AccountRegion": "BD",
      "AccountLikes": 9163,
      "AccountCreateTime": "1617791209",
      "AccountLastLogin": "1788325315"
    },
    "AccountProfileInfo": {
      "BrMaxRank": 317, "BrRankPoint": 2994,
      "CsMaxRank": 321, "CsRankPoint": 91,
      "ShowBrRank": true, "ShowCsRank": true
    },
    "EquippedItemsInfo": {
      "EquippedAvatarId": 902050007,
      "EquippedBannerId": 901042013,
      "EquippedBPID": 1001000100,
      "EquippedBPBadges": 111,
      "EquippedOutfit": [ 50 ],
      "EquippedSkills": [ 211046056, 203046064, 204051038, 205000225, 214039008 ]
    },
    "SocialInfo": {
      "accountId": "3000391898",
      "gender": "GENDERMALE",
      "language": "LANGUAGECNTRADITIONAL",
      "signature": "[b][c][FF0000]know your place f.o.o.l"
    },
    "CreditScoreInfo": { "creditScore": 100 },
    "PetInfo": { "id": 1300000123, "level": 4, "exp": 540, "skinId": 1310000235 },
    "BattleStats": {
      "solostats": { "gamesplayed": 1331, "wins": 24, "kills": 1905, "damage": 587364, "headshots": 820 },
      "duostats": { "gamesplayed": 1381, "wins": 62, "kills": 1604, "damage": 751039, "headshots": 769 },
      "quadstats": { "gamesplayed": 2942, "wins": 226, "kills": 4517, "damage": 2291325, "headshots": 2376 }
    }
  }
}
```

4. Data Field Dictionary

- **AccountInfo:** Player in-game nickname (full Unicode/stylized font), level, likes count, total experience points (EXP), account creation and last active timestamps.
- **AccountProfileInfo:** Battle Royale (BR) and Clash Squad (CS) tier ranks and current competitive points.
- **EquippedItemsInfo:** Active cosmetic item IDs including Avatar icon, Banner background, Battle Pass Badge, clothes, and character skill presets.
- **SocialInfo:** Player's profile bio / signature (including hex color BBCode), gender tag, and client language.
- **BattleStats:** Complete lifetime career performance: Total games played, victories, total kills, damage dealt, and headshots for Solo, Duo, and Squad.

5. Free Fire In-Game Asset CDN (Avatars & Banners)

Use the equipped IDs from the API to load the official in-game images directly via fast global CDN:

Asset Type	CDN URL Template
Avatar Icon	<code>https://cdn.jsdelivr.net/gh/TSun-FreeFire/TSun-FF-Avatar-And-Banners@main/icons/{EquippedAvatarId}.png</code>
Banner Cover	<code>https://cdn.jsdelivr.net/gh/TSun-FreeFire/TSun-FF-Avatar-And-Banners@main/icons/{EquippedBannerId}.png</code>
Battle Pass Badge	<code>https://cdn.jsdelivr.net/gh/TSun-FreeFire/TSun-FF-Avatar-And-Banners@main/icons/{EquippedBPID}.png</code>

6. Code Integration Examples

JavaScript (Fetch API):

```
const uid = "3000391898";
fetch(`https://my-ff-api-three.vercel.app/api/player-info?uid=${uid}`)
  .then(res => res.json())
  .then(json => {
    if (json.success) {
      console.log(`Player: ${json.data.AccountInfo.AccountName} (Lv. ${json.data.AccountInfo.AccountLevel})`);
      console.log(`Likes: ${json.data.AccountInfo.AccountLikes}`);
    }
  });
```

Python (Requests):

```
import requests

url = "https://my-ff-api-three.vercel.app/api/player-info?uid=3000391898&region=BD"
res = requests.get(url, timeout=10).json()

if res.get("success"):
    player = res["data"]["AccountInfo"]
    print(f"Player: {player['AccountName']} | Likes: {player['AccountLikes']}")
```

PHP (cURL):

```
<?php
$uid = "3000391898";
$url = "https://my-ff-api-three.vercel.app/api/player-info?uid=" . urlencode($uid);
$res = json_decode(file_get_contents($url), true);

if (!empty($res['success'])) {
    echo "Player: " . $res['data']['AccountInfo']['AccountName'];
}
?>
```

7. Maintenance & Safe Operation

- **Account Safety:** Neither the searched player's account nor your personal main game account can be banned. The API only performs public profile reads identical to the in-game 'View Profile' feature.
- **Bot Credential Rotation:** If you ever wish to rotate the bot account, update BOT_UID and BOT_PASSWORD in `ff-api/api/player-info.js` (lines 4-5) and push to GitHub, or set them under **Settings > Environment Variables** on your Vercel project dashboard.

8. HTTP Status Codes

Status	Meaning	Description
200 OK	Success	Player profile retrieved successfully.
400 Bad Request	Invalid Input	Missing or non-numeric UID parameter.
404 Not Found	Not Found	The UID is not registered on Garena game servers.
500 Server Error	Gateway Error	Temporary Garena connection error. Auto-retries automatically.
